Melancholia of Father Follows Death of .Son, Who Was Killed With a Cat Riffe.

While his daughters' guests were being entertained at a dancing party in his house in Easton Avenue Heights, St. Louis County, Sunday night, Heary Hagemeier drank a half ounce of carbolic acid, and died within an hour.

Hagemeier drank the poison about 10:30 o'clock, while the dancers were making merry in an adjoining room. Fifteen minutes later he was heard groaning by a guest, who investigated and found him ving on the floor. The revelry stopped mmediately.

A messenger was sent to Wellston, about one mile distant, for Doctor Rolla Bracy, but Hagemeler died almost as soon is the physician reached the house.

Hagemeier was as merry as anyone at he party during the early hours of the vening and had assisted his daughters in ecciving. About 10 o'clock he excused imself and went to a neighboring saloon. While absent he purchased the acid. Reuzning, Hagemeier went into an adjoinig room to that occupied by the guests, nixed the acid in beer and drank it, Coroner Koch went to the home yester-

POSSE CAPTURES FUGITIVE WHO SHOT DETECTIVE; MAN ARRESTED IDENTIFIED AS KEITH'S SLAYER.

Detective Mike Cremin of Chief Desmond's Staff Declares John Roach Shot Him During Attempted Robbery of St. Charles Hotel-Had Loaded Revolver in Hand When Captured-Fahey in a Serious Condition-Gold and Silver Watches Recovered.

Roach was captured by a posse of East St. Louis policemen, after he had shot Detective Fahey. He and Clegg have been identified as members of a gang that killed a conductor last June.

In a dark room at the home of Jos Wright, on the Caseyville road, four miles from East St. Louis, half a dozen East St. Louis officers captured John, alias "Duck," Roach, who a few hours before had shot Detective Jack Fahey in the back while the latter had him under ar-

Roach had a loaded revolver in his hand when captured, and it is believed that he meant to fight off the officers, but that his nerve falled him when three broke into the room at the same instant.

Yesterday's developments cause Chief of Police Purdy to believe that Roach and George A. Clegg, but who has been identified as George Flizgerald, the man who

Roach and Clegg in a saloon as suspicious characters.

Roach and Clegg told the police that they had been in Flast St. Louis only two hours when they were arrested. They said that they came in on the Baltimore and Ohlo Raliroad and got off at the city limits, going to the Wright home. This statement was corroborated by Mrs. Wright and her daughter.

Yesterday morning they were taken before Justice of the Peace Boyne, who held them in \$2,500 bond each, on a charge of assualt, with intent to kill.

Both Clegg and Roach refused to talk about the watches which were found in their grip. Clegg would only say that he sold "pony" jewelry for a living. Several of the watches are very expensive and are engraved, three with names and one with a monogram. The numbers and makes of the watches are as follows:

PHILIPPINE REPORT SENT TO SENATE, MCKINLEY HIGH SCHOOL

Governor Taft in It Analyzes So cial and Commercial Conditions of Islands.

INVITED LARGE INVESTMENTS.

Predicts Waning Influence of Friars and an Era of Brightness Under the Administration of American Catholics.

Washington, Feb. 1.-The President to day sent to the Senate the annual report of the Philippine Commission, including the report of the Civil Governor of the Philippine Islands and the reports of the heads of the executive department for the period ended December 23, 1963.

The report of the commission contains a detailed statement by the Auditor for the islands of expenditures under the appropriation of \$1,000,000 for the relief of distress in the Philippine Islands.

Governor Taft says that the year was one of considerable suffering among the people of the Philippine Islands, on ac-

people of the Philippine Islands, on account of a short food supply, but that the worst is passed.

The value of the sugar exports from the Islands for the fiscal year chied June 39, 1903, increased \$1,191,395, over the previous year, due, Governor Taft says, to the natural result of a betterment of conditions as to tranquility.

Speaking of the conditions in the Islands Governor Taft says that "at no time has there been less hadronism than when this was written, December 10, 1993."

Governor Taft says political conditions on the Islands make the time ripe for a period of great construction. During the next decade railroads, canal and steamship companies, he said, should revolutionize the interior trade of the Islands and should have a marked effect on the export trade.

For this reason he recommends that the

tionize the interior trade of the islands and should have a marked effect on the export trade.

For this reason he recommends that the Philippine Commission be authorized, with the approval of the Secretary of War and the President, to enter into contracts with railroad companies, to which a franchise for the construction of roads shall be granted, by which an income not exceeding 4 per cent, and probably not exceeding 3 per cent, shall be guaranteed on the investment, the amount of which shall be fixed in the law.

Governor Taft reviews at length the negotiations leading up to the present status of the friars' iand settlement. He says he is officially informed that the number of friars in the islands is 246, as compared with 1,613 in the figures given by the apostolic delegation in 1888. Governor Taft says:

"Whatever may happen during the first few months of the coming of the American Bishops, it is certain that the spirit of the American Catholic Church is so different from that of the Spanish church from a political standpoint that the influence of the Spanish friars will gradually wane and that of the American Bishops become controlling, bringing about that which we so much desire—the American-izing of the Roman Catholic Church in the Philippines."

tion," which is to be held in the Lieder-kranz Hall on February 22. The heldes will read indictments against the prominent young bachelors of Helleville, and it is believed that highly interesting papers will be the result.
